

Search for Eighteen

The object of this game is to make each triangle equal eighteen. You can add, subtract, multiply, or divide. You must use each of the three numbers, but each number can be used only once. There may be more than one solution. Look at the example below.

EXAMPLE

$9 \div 3 = 3 \rightarrow 3 \times 6 = \underline{18}$
OR $9 + 3 + 6 = \underline{18}$
